SUMMARY

Results-driven Full Stack Software Engineer with a proven track record of developing scalable microservices-based enterprise applications. Expertise in Java, Spring Boot, ReactJS, and Next.js. Strong domain knowledge in financial technology and banking systems, consistently delivering secure, high-performance solutions for leading financial institutions.

SKILLS

- **Languages & Databases:** Java, JS/TS, SQL, HTML, CSS; MongoDB, Couchbase, NoSQL , Postgres SQL
- **Frontend:** ReactJS, NextJS, React Native, MaterialUI, ShadcnUI, Tailwind/Aceternity
- **Backend & Tools:** Spring Boot, Spring Security , Kafka Microservice, REST APIs, AWS, Docker, Kubernetes, Kibana, Jenkins, Git

EXPERIENCE

Associate Product Engineer | *Lentra* | January 2025 – Present | Noida, Uttar Pradesh, India

- Drive end-to-end development across key lending domains, specialization in core Loan Management System (LMS) and Loan Origination System (LOS) workflows.
- Engineer and maintain scalable microservices within an expansive ecosystem of over 150 services, utilizing Java, Spring Boot, Apache Kafka, Camunda, and ReactJS to seamlessly handle high-volume financial transactions.
- Streamline transaction workflows across disbursement, repayment, and reporting modules, cutting processing latency by about 25% while maintaining strict data integrity.
- Partner with cross-functional teams to build custom feature rollouts for major client institutions such as Central Bank of India, Poonawalla Fincorp, and BharatPe.
- Maintain robust production stability and near-zero downtime through continuous performance tuning, proactive bug resolution, and strict adherence to banking regulations.

Associate Analyst | *Tech Mahindra* | May 2024 – January 2025

- Architected an internal project management system that automated routine data tasks, reducing overall maintenance overhead by nearly a third.
- Designed responsive vendor admin panels featuring multi-role authentication for hundreds of active users, using React and Node.js to improve backend query responsiveness.
- Crafted dynamic UI components and landing experiences with modern CSS animations, noticeably boosting user interaction and engagement metrics.

PROJECTS

SchoolM | *Full Stack Microservices Platform*

- Engineered a robust educational management platform leveraging microservices architecture with Java, Spring Boot, Next.js, PostgreSQL, and Couchbase.
- Developed independent backend services including attendance tracking, timetabling, and user management, ensuring high scalability and modular maintainability.
- Designed complex database schemas using SQL and implemented performance optimizations like backend caching mechanisms to improve system responsiveness.

Rishi Tracker | *React Native Application*

- Built a premium Daily Task and Expense Tracking mobile application using React Native and Expo, featuring a dynamic theme engine and seamless user experience.
- Implemented an advanced timeline view with smart validation to prevent overlapping tasks, and configured continuous background alarms and notification alerts.
- Designed analytical dashboards with dynamically rendered pie charts to visualize time distribution and expense analytics for daily and monthly metrics.

EDUCATION

B.Tech in Computer Science | Lovely Professional University | 2020 – 2024
Specialization in Full Stack Development (UPGRAD)
