SUMMARY

Results-driven Full Stack Software Engineer with a proven track record of developing scalable microservices-based enterprise applications. Expertise in Java, Spring Boot, ReactJS, and Next.js. Strong domain knowledge in financial technology and banking systems, consistently delivering secure, high-performance solutions for leading financial institutions.

SKILLS

- **Languages & Databases:** Java, JS/TS, SQL, HTML, CSS; MongoDB, Couchbase, NoSQL
- **Frontend:** ReactJS, NextJS, AngularJS, React Native, MaterialUI, ShadcnUI, Tailwind/Aceternity
- **Backend & Tools:** Spring Boot, Node.js, Express, REST APIs, AWS, Docker, Kubernetes, Jenkins, Git

EXPERIENCE

Associate Product Engineer | Lentra | January 2025 – Present | Noida, Uttar Pradesh, India

- Driving end-to-end development in the Lending domain with deep hands-on expertise in Loan Management System (LMS) and Loan Origination System (LOS).
- Contributing as a Full Stack Software Developer, designing and building scalable microservices-based applications utilizing Java, Spring Boot, and AngularJS.
- Developing secure, high-performance, and production-grade financial solutions, implementing real-time workflows including disbursement, repayment, ledger, and reporting modules.
- Collaborating with cross-functional teams to deliver client-specific customizations for major financial institutions including Central Bank of India, Poonawalla Fincorp, BharatPe, RamFincorp, and Infina.
- Ensuring enterprise-level production stability, performance optimization, and rigorous issue resolution aligned with banking regulatory requirements.

Web Developer | Tech Mahindra | May 2024 – January 2025

- Developed a comprehensive internal project management system for the department, streamlining data management and reducing maintenance costs by 30%.
- Designed and optimized vendor management admin panels with multiple-role authentication, leveraging React and Node.js for seamless backend functionality.
- Created engaging animation banners and landing pages utilizing advanced CSS animations and React components to enhance visual appeal and responsiveness.

PROJECTS

SchoolIM | Full Stack Microservices Platform

- Engineered a robust educational management platform leveraging microservices architecture with Java, Spring Boot, Next.js, PostgreSQL, and Couchbase.
- Developed independent backend services including attendance tracking, timetabling, and user management, ensuring high scalability and modular maintainability.
- Designed complex database schemas using SQL and implemented performance optimizations like backend caching mechanisms to improve system responsiveness.

Rishi Tracker | React Native Application

- Built a premium Daily Task and Expense Tracking mobile application using React Native and Expo, featuring a dynamic theme engine and seamless user experience.
- Implemented an advanced timeline view with smart validation to prevent overlapping tasks, and configured continuous background alarms and notification alerts.
- Designed analytical dashboards with dynamically rendered pie charts to visualize time distribution and expense analytics for daily and monthly metrics.

EDUCATION

B.Tech in Computer Science | Lovely Professional University | 2020 – 2024
Specialization in Full Stack Development (UPGRAD)
